

Technical Rider · DJ AndyKachess (EN)

Version 1.0 · 2026-08-22. Update when the setup changes. Print to PDF for promoters.

Performance format

Type: DJ set

Duration: 60–120 minutes (to be confirmed with the promoter)

Genre: Drum & Bass (Neurofunk, Drill'n'bass), Tech House / Melodic Progressive

Based in: Murmansk, Russia

Primary setup (preferred)

- ****Media players:**** 2 × Pioneer CDJ-2000/3000, Denon DJ SC6000 or equivalent (XDJ-700 and above)
- ****Mixer:**** Pioneer DJM-450/750/900 (or equivalent) with balanced XLR master out
- ****USB:**** Rekordbox-format flash drives provided by the artist (×2, mirrored)

Alternative setup (if the above is unavailable)

- DJ controller + artist's laptop (USB-C/USB-A cables carried by the artist)
- Master output: XLR or RCA (adapters carried by the artist)

Sound & monitoring

- FOH system, minimum 2 channels + subwoofers: ****frequencies 30–120 Hz are critical for DnB****
- Nearfield booth monitor aimed at the DJ workstation
- Monitor level controlled from the booth

Power & workspace

- 2 × 220V power sockets at the workstation, power strip
- Table/booth from 1.2 × 0.6 m (4 × 2 ft), stable, vibration-free surface
- Booth lighting where possible (DnB sets run in the dark — at minimum the workstation must be lit)

Soundcheck & logistics

- ****Soundcheck:**** 30 minutes before doors open
- ****Load-in:**** 60 minutes before the performance `[to be confirmed with the promoter]`
- ****Travel:**** `[specify travel/fee terms at booking]`

Hospitality

- Still water at the workstation
- `[Anything else — by agreement with the promoter]`
